Integrated CDMO Solutions For Your Biologics

AsymBio provides integrated CDMO solutions to enable your success. Our streamlined development & manufacturing process ensures timely milestone delivery, effective budget management, and robust regulatory strategies.

Premier Site Locations for Top-Tier Services

- Shanghai Fengxian**
- Antibody clinical & commercial manufacturing**
- DS: 2*2000L bioreactors
 - DP:
 - ORABS-based filling line
 - 20 m freeze dryer
- Bioconjugate clinical & commercial manufacturing (in expansion)**
- DS: 2*200L/500L conjugation reactors
 - DP:
 - Isolator-based filling system
 - 2*20 m² freeze dryer

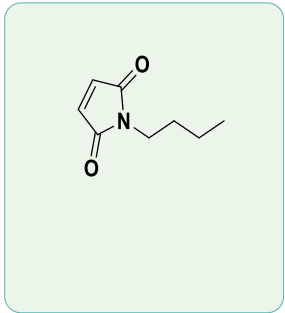

Partner with AsymBio for your next biologics! We simplify the path of your molecules from research to market with 100+ cumulative project experience in ADC, RDC, AOC, etc.

BIOCONJUGATES

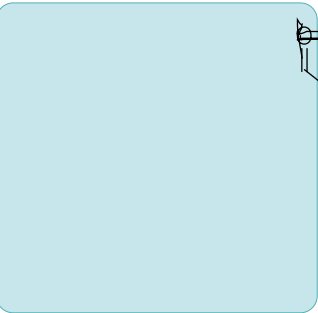

AsymBio’s ONE solution capability expedites your bioconjugate innovations to commercialization on the promise of operation excellence

We accelerate the development and manufacturing of your PL with our 25+ years of CDMO experience in small molecules

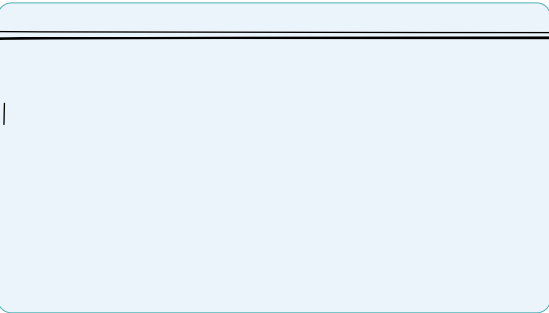

Attachment

- Click reaction
- MC attachment
- Others

Linker

- Peptide linker
- PEG linker
- Others

Payload

- Tubulin inhibitors
 - Maytansine
 - Auristatin
 - MMAE
 - MMAF
 - etc.
- DNA damaging agents
 - Dxd
 - Camptothecin
 - Exatecan
 - etc.
- Other novel MoA

A solid foundation to advance your bioconjugates

0EB 5

Facilities for handling potent materials

5,000+m²

HP manufacturing area for PL

50+

IND projects

10+

NDA projects

Service Portfolios Across Novel Drug Conjugate Boundaries

We ensure the speed to clinic & to market on the combined strength of all ADC technologies and expertise assembled under ONE organization.
